

# MORE FROM MICHAEL!

Dear Editor,  
I received the first issue of *Primary Teacher Update* this morning and am very much enjoying reading it. I do hope you'll do a more detailed follow-up on Michael Rosen's reading revolution (October, page 20), and I loved the 'Don't try this at school' column (October page 32) – is that going to be a regular feature?

Liz Rhodes, primary teacher, Exeter

Hi Liz – thanks for your feedback. Michael Rosen is always a big favourite, so we will definitely feature lots more of his ideas going forward. Hope you enjoyed 'Don't Try this at school: The school visitor' (page 50). Look out for 'Report writing' in next month's issue!

## WIN A GLOBEE!

*Primary Teacher Update* is giving away a GLOBEE (worth £20) to 10 lucky winners.

Globees are beautifully illustrated maps of top-ranking world tourist city destinations, presented on a globe. Each shows around 40 key landmarks, complete with a fact-packed 16 page booklet about the places depicted.

Children can learn about different cities, their icons, landmarks, history and tourist sites, in a fun way.

The brainchild of chartered accountant David Sinclair, Globees have swept round the world in little more than a year. There are currently 24 city Globees, including London and Paris, with more in development.

For more information, visit [www.globee.co.uk](http://www.globee.co.uk)

For a chance of winning a GLOBEE, answer the following question:

How many city Globees are there?

Send your answer to [ptu@markallengroup.com](mailto:ptu@markallengroup.com) before 30 November 2011. Entries are limited to one per person.

## HAVE YOUR SAY!

Please send letters to:  
Letters page, PTU, St Judes Church, Dulwich Road, London SE24 0PB  
or email: [ptu@markallengroup.com](mailto:ptu@markallengroup.com)

## GREEN COMPETITION

Tetra Pak and WWF-UK have launched a fantastic new competition for children aged between seven and 14, inviting them to use their creativity to design an image to help raise the public's awareness of renewable resources.

The child who submits the winning image will win £100, with the opportunity for a further £2,000 to be donated to his or her school to fund an environmental project.

Tetra Pak and WWF-UK have worked with education professionals to develop a set of supporting resources for schools and teachers (including lesson plans, fun 'filler' activities and an assembly idea) to introduce this important subject and help pupils understand the impact our choices have on the natural environment.

The resources explore topics such as sustainable living, thinking global and acting local, and environmental poetry, as well as the importance of choosing goods and materials from renewable resources. All lesson plans link to elements of key stage two or three learning, within the National Curriculum.

The closing date for entries is 2 December 2011 and the winning renewable image will be selected in January 2012 by a panel of judges and used by Tetra Pak and WWF-UK in future campaign activities.

For more information on this competition, and to download the educational materials for 'Design an Image' visit the Renewable Idea website: [www.renewableidea.co.uk](http://www.renewableidea.co.uk)
